

# Implementing Healthcare Information Technology Systems

***Widespread use of health information technology within the healthcare industry will improve the quality of health care, prevent medical errors, reduce health care costs, increase administrative efficiencies, decrease paperwork, and expand access to affordable health care.***

Modern Med Health Solutions assist organizations in implementing advanced and secure information technology systems that focus on affordable, effective and accessible healthcare services delivery. Our team of experienced and highly trained professionals help to develop strategies to become more cost efficient and more collaborative; and to meet the security challenges of ever-evolving threats to your systems and data. Our capabilities allow us to find creative ways to efficiently manage people, processes and technology to deliver integrated and effective care, as well as efficient business services.

We are prepared to provide your organization with enterprise technological solutions that focus on adaptation to new regulatory requirements and to rationalize and integrate systems that create a seamless flow from patient to Provider.

*Modern Med Health Solutions is one of the top 1% of companies regarding its commitment to Quality, possessing the prestigious ISO 9001 Quality Management System Certification.*

Our staff has direct experience and involvement with designing an enterprise information management architecture that is flexible, valuable, and meets new technology challenges in today's market. Having been responsible for local government, federal government, and public companies' systems, we understand what it takes to ensure the integrity and security of electronic health records, enable timely access to accurate medical data and ensure HIPAA compliance. We help create flexible, dynamic plans that align with your mission and goals as well as anticipate future conditions.

Strategic thinking about the application of new technology — such as remotely provided services and cloud architectures — can be important to controlling costs and optimizing information technology value. Without a strategic approach, organizations run the risk of investing in solutions that neither integrate well with their enterprise nor optimize business value. Modern Med Health Solutions seeks to design an information management architecture that gives you the flexibility to meet new technology challenges while getting the most value from legacy investments.

As an ISO 9001 Certified, Women-Owned, and HUB-Zone Small Business, Modern Med Health Solutions is fully committed to providing information technology solutions that are successful in both security and compliance, and innovative for the future of healthcare.

## Healthcare IT Demands Total Commitment to Quality

At the core of all of our services is our total commitment to quality. Modern Med Health Solutions understands that in the healthcare community, a lapse in quality can have devastating consequences. As such, Modern Med Health Solutions is committed to ISO 9001-Certified Quality Management System processes.

ISO 9001:2015 is an international standard dedicated to Quality Management Systems (QMS). It outlines a framework for improving quality for any organization looking to provide products and services that consistently meet the highest requirements for performance. An ISO 9001-certified Quality Management System is the aggregate of all the processes, resources, assets, and cultural values that support the goal of total patient care and healthcare excellence.
